EDUCATION

PSIT College of Engineering, Dr. A.P.J. Abdul Kalam Technical University Kanpur, Uttar Pradesh, India
Bachelor of Technology in Computer Science and Engineering (CGPA: 8.5/10) 2018-2022

Vidya Niketan Inter College, Uttar Pradesh State Board Kanpur, Uttar Pradesh, India
Intermediate (Percentage:84%) 2017

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Java, python, C

Frontend: React, Redux, Recoil, Next.js, Angular, HTML, CSS

Backend & Databases: Express, Nodejs, Hono, Cloudflare Workers, MongoDB, PostgreSQL, MySQL

Tools & others: VScode, Git, GitHub, Postman, Vim, Docker, AWS, Jira, Selenium, Tosca, ServiceNow

WORK EXPERIENCE

ServiceNow developer

Wipro, Gurugram, India

July 2023 - Present

- Created and optimized service forms, reducing submission time by 20% for over 1000 users.
- Custom Feature Development: Developed automated approval workflows and dynamic form fields using JavaScript, Glide scripting, and Flow Designer, increasing workflow automation by 30%.
- ATF and Jira Integration: Integrated ATF in ServiceNow with Jira using REST APIs, cutting bug reporting time by 9.5 minutes per report, saving 16 hours monthly for 100 bugs.
- Client Requirement Management: Conducted regular client meetings, achieving a 95% client satisfaction rate.

Front End Developer

Wipro, Bangalore, India

December 2022 - March 2023

- Resolved over several bugs, significantly improving code quality.
- Involved in writing JavaScript for dynamic manipulation of the elements on the screen and to validate the input.
- Actively participated in agile methodologies, increasing team efficiency and ensuring timely project deliveries.

Full Stack Development Intern

Wipro, Bangalore, India

October 2022 - December 2022

- Fixed 30+ bugs in JavaScript and Node.js scripts.
- Built an self-learning e-commerce site with 100+ products, shopping cart, and secure authentication.

PROJECTS

Real Time Chat App | *React.js, MongoDB, express, socket.io* | [Try it!](#)

- Build a real-time chat application, Leveraged the MERN stack for seamless development
- Enabled real-time communication with socket.io, implemented bidirectional messaging between users and reducing the response time by 20%.
- Designed a responsive interface, improving user interaction and retention by 15%.

Blogging Website | *Cloudflare Workers, Hono, TypeScript, JWT, PostgreSQL, Prisma* | [Try it!](#)

- Built a Medium clone with serverless architecture, handling 50+ daily active users.
- Streamlined database operations using PostgreSQL and Prisma ORM, improving query performance by 25%.
- Implemented JWT authentication and input validation with Zod, enhancing security and reducing errors by 30%.

Myntra UI clone | *React, Redux, React-router, Express* | [GitHub](#)

- Developed Myntra inspired e-commerce UI using React
- Integrated Redux for state management, managed cart items and user preferences efficiently
- Implemented React Router for seamless navigation

ACHIVEMENTS

- Completed more than 300 problems on Leetcode
- Authored 10+ technical blog posts on JavaScript and web development
- Achieved MEAN Stack Certification by Great Learning. [Link](#)
